

**Welcome address
to the participants, visitors and
organisers of the RENWEX 2019
Renewable Energy & Electric Vehicles
International Exhibition**

On behalf of the Russian Chamber of Commerce and Industry let me welcome the participants, visitors and organisers of the RENWEX 2019 Renewable Energy & Electric Vehicles International Exhibition.

Renewable energy is one of the fastest growing sectors of economy in the world. State-of-the-art technology and renewable energy allows providing mankind with the necessary energy even today.

The new exhibition RENWEX will enable to fully consider the most relevant issues of development of alternative energy, electric vehicles and energy efficiency. Participation of representatives of government authorities, businesses, research centres, and industrial companies working on developments in the field of new energy will raise awareness on this relevant topic.

I am positive RENWEX will give a strong impetus to the development of new sources of energy and their active integration into the current energy system. The trade show will help attract investments for implementation of promising projects in the alternative energy and development of international cooperation in this field.

I would like to wish the participants, visitors and organisers interesting work, productive meetings, and implementation of the plans.

Sergey Katyrin
President
Russian Chamber of Commerce
and Industry
