

Welcome Message to the participants of the RENWEX 2021 International Exhibition

Dear colleagues,
On behalf of the Mosgortrans SUE management, I would like to welcome exhibitors and visitors to the RENWEX 2021. Renewable Energy and Electric Vehicles international exhibition.

Moscow today is a leader in developing innovative urban transport. The capital with a population of more than 12 million people needs a well-coordinated transport network, it forms the backbone of the city, enables millions of people to stay mobile. At the same time, it is important to us that transport organically complements the urban area without oppressing the environment. To this end, we are placing great emphasis on developing electric transport - buying modern electric buses and trams, and focusing on renewable energy.

Moscow is already the undisputed European leader in the number of electric buses. Now our task is to strengthen the position of electric transport and develop in line with the trends and demands of the city's residents. Events such as today's are particularly important for this. They bring together the people most interested in the green development of our city and give birth to the best ideas.

Leonid Antonov
Director General
Mosgortrans SUE
