

## Welcome Message to the participants of the RENWEX 2021 International Exhibition

**O**n behalf of the Russian Chamber of Commerce and Industry, I would like to welcome exhibitors, visitors and organisers of the RENWEX 2021. Renewable Energy and Electric Vehicles international exhibition.

Renewable energy in Russia is in its infancy and has great development potential and prospects to take a significant part in the country's energy balance.

The RENWEX exhibition aims to actively promote the development of the retail market for renewable energy in Russia, popularise cutting-edge technologies and environmental engineering, introduce innovative equipment, discuss topical issues in the context of regional energy, and demonstrate scientific and technological potential.

I am positive that the exhibition and the extensive conference programme will accelerate the consideration of issues related to the introduction of new technologies in the energy and electric transport sectors, attracting investments, and the creation of industry infrastructure. I wish all participants fruitful meetings, success in business and development of renewable energy in our country!

**Sergey Katyrin**  
President  
of the Russian Chamber  
of Commerce and Industry
